

Mahdiah El-Jed , Senior Bids & Proposals Officer

Mahdiah has experience conducting and coordinating research projects (including collaborative and participatory research as well as action research), mainly studying social and environmental impacts of socio-technical innovations, including how they are shaping public policy. Mahdiah has a MSc in Environmental Sciences with her thesis focusing on the scaling strategies for spreading social and technical innovations, more specifically in the alternative food production/marketing and renewable energy fields, using sustainability transitions and transition management as the conceptual and methodological frameworks.

Mahdiah has been living in the UAE since September 2015. She joined Dubai Carbon as Bids and Proposals Officer and is part of the External Communications team. In collaboration with the technical team, she writes proposals and coordinates submissions.
